## APPENDIX.

### PLAN TO INCREASE CHARTER CAPITAL THROUGH THE ISSUANCE OF SHARES TO PAY THE 2025 DIVIDEND

(Attached to Submission No.: /TTr-PTSC-HDQT dated June 2026)

#### I. Legal conditions

*Pursuant to Article 60 of Decree No. 155/2020/ND-CP dated December 31, 2020, detailing the implementation of a number of articles of the Law on Securities, the conditions for issuing shares to pay dividends are as follows: “1. There is a plan for issuing shares to pay dividends approved by the General Meeting of Shareholders; 2. There is sufficient undistributed after-tax profit, based on the most recent annual financial statements audited by an approved auditing organization, to pay the dividend. Where a public company that is a parent company issues shares to pay dividends, the profit approved for distribution must not exceed the undistributed after-tax profit shown in the audited consolidated financial statements. Where the profit approved for distribution is lower than the undistributed after-tax profit shown in the consolidated financial statements and higher than the undistributed after-tax profit shown in the separate financial statements of the parent company, the company may only make the distribution after profits have been transferred from its subsidiaries to the parent company; 3. There is a plan to handle fractional shares and odd-lot shares, if any, approved by the General Meeting of Shareholders or the Board of Directors....”.*

Petrovietnam Technical Services Corporation (the Corporation) plans to issue shares to pay dividends from undistributed after-tax profit based on the audited 2025 separate financial statements of the Parent Company. Therefore, from a legal perspective, after obtaining approval from the General Meeting of Shareholders for the plan, the Corporation will meet the conditions to implement the plan as set out below.

#### II. Necessity of implementing the plan to increase charter capital through the issuance of shares to pay dividends

As the oil and gas industry enters a new growth cycle and the offshore renewable energy sector continues to expand strongly in Asia, the Corporation is facing a valuable opportunity to make a significant breakthrough. Increasing charter capital is a strategic step for the Corporation to strengthen its competitiveness, enhance its financial capacity, and ensure the successful implementation of large-scale projects during the 2026-2030 period. In particular:

- Increasing the charter capital through the issuance of shares to pay dividends will help maintain a healthy financial leverage ratio, improve financial autonomy, and create a solid financial foundation for long-term investment expansion.
- Ensuring sufficient equity capital for development investment under the five-year production and business plan for the 2026-2030 period, and accumulating investment capital for the Development Strategy to 2030, with a vision to 2050. This will focus on arranging financing for traditional oil and gas projects and developing the offshore renewable energy value chain, both of which require very large investment capital.
- Ensuring strong financial resources to promptly meet urgent capital needs, especially

by securing sufficient equity capital for projects with large total investment values, in accordance with the approved project capital structure, namely equity and debt. This will help meet capital structure requirements in line with international standards and support project implementation.

It can be seen that increasing charter capital is an essential requirement to ensure the successful implementation of major projects under the Corporation's development strategy and plan for the 2026-2030 period, with a vision to 2050. The objective is to increase shareholder value, expand the Corporation's scale, and build a strong foundation for the Corporation's sustainable development in the coming years.
